SUMMARY

As a seasoned Software Developer with a passion for creating impactful online experiences. With a strong background in web development, software engineering, and digital marketing, I specialize in delivering high-quality solutions that drive brand success.

I bring extensive experience in web design, software development, and content creation, leveraging technologies like HTML5, CSS3, JavaScript, MySQL, and more. I am proficient in integrating applications with third-party services via REST APIs and have a proven track record of enhancing functionality and connectivity.

Currently, as an Azure Cloud Support Engineer at Tek Experts, I troubleshoot and resolve complex technical issues, ensuring high system availability and customer satisfaction. In my previous roles, I've managed large-scale e-commerce systems, reduced processing times by 40%, optimized database queries, and increased user engagement by 50%. My expertise also includes improving SEO, and collaborating with cross-functional teams using Agile methodologies to enhance user experience.

With a passion for learning and adapting to new technologies, I am poised to drive innovation in the digital landscape.

EXPERIENCE

Azure Cloud Support Engineer

Tek Experts Nig

October 2023 - Present, Lagos, Nigeria

- Troubleshoot and resolved over 300 Azure incidents per quarter, ensuring high availability and minimizing downtime for VMs, Storage accounts, and Active Directory services.
- Exceeded service level agreements by 20% monthly, resolving over 50 complex technical issues for Azure IaaS environments.
- Ensured optimal system performance and high customer satisfaction by resolving an average of 30 Azure infrastructure-related support tickets weekly.
- Provided prompt troubleshooting assistance and guidance for Azure Virtual Machines, addressing performance, connectivity, and configuration problems.
- Collaborated with internal teams to escalate and resolve complex issues, documented interactions and solutions, and proposed enhancements to improve customer experience.

Software Developer

IG Software Nig

September 2020 - October 2023, Lagos, Nigeria

- I design, code, and test software applications, completing 10+ projects annually and improving system functionality by 25%.
- I collaborate with cross-functional teams, including designers, product managers, and other developers, contributing to projects that increase productivity by 30%.
- I identify and resolve software bugs and performance issues, achieving a 90% bug resolution rate within the first week of detection.
- I create and maintain technical documentation for software applications, ensuring clear guidelines and reducing onboarding time for new developers by 20%.
- I follow industry best practices for coding, testing, and deploying software, resulting in a 40% reduction in deployment errors and enhancing overall software quality.
-

Junior Software Developer

3 Core Technologies

August 2019 – February 2020, Lagos, Nigeria

- I contributed to the creation and maintenance of websites, completing tasks for 10+ projects annually, and ensuring alignment with project specifications and timelines.
- I write clean, efficient code, resolving 80% of assigned bugs and issues within a week.
- I assisted in the implementation of basic website features and functionalities, improving overall site performance by 20%.
- I collaborated closely with senior developers, participating in 15+ code reviews and incorporating feedback, leading to a 30% improvement in coding skills and efficiency.
- I performed routine testing and updates, contributing to a 25% reduction in website downtime and ensuring consistent security and performance.
