LANGUAGES

- English (Fluent)

ALEXANDER IGONOR

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

As a Software Developer skilled in web development, software engineering, and digital marketing, I create impactful online solutions. With proficiency in HTML5, CSS3, JavaScript, and MySQL, I improve functionality via REST APIs. At Tek Experts as an Azure Cloud Support Engineer, I solve complex technical issues, ensuring high system availability and customer satisfaction, while fostering innovation in the digital landscape.

WORK EXPERIENCE

- Tek Experts** 2023 - PRESENT
Azure Cloud Support Engineer
 - Troubleshoot and resolve over 300 Azure incidents per quarter, ensuring high availability and minimizing downtime for VMs, Storage accounts, and Active Directory services.
 - Exceeded service level agreements by 20% monthly, resolving over 50 complex technical issues for Azure IaaS environments.
 - Collaborated with internal teams to escalate and resolve complex issues, documented interactions and solutions and proposed enhancements to improve customer experience.
- IG Software Nig** 2020 - 2023
Software Developer
 - Designed, coded, and tested software applications, completing 10+ projects annually and improving system functionality by 25%.
 - Collaborated with cross-functional teams, including designers, product managers, and other developers, contributing to projects that increase productivity by 30%.
 - Identified and resolved software bugs and performance issues, achieving a 90% bug resolution rate within the first week of detection.
- 3 Core Technologies** 2019 - 2020
Junior Software Developer
 - Contributed to the creation and maintenance of websites, completing tasks for 10+ projects annually, and ensuring alignment with project specifications and timelines.
 - Wrote clean, efficient code, resolving 80% of assigned bugs and issues within a week.
 - Assisted in the implementation of basic website features and functionalities, improving overall site performance by 20%.
 - Worked closely with senior developers, participating in 15+ code reviews and incorporating feedback, leading to a 30% improvement in coding skills and efficiency..
